Count on **us**

Who We are

Vy Systems is a Global Web Application Software (G-WASS) company primarily offering web application solutions to its customers at worldwide locations. We service our customers with "ON-TIME RESPONSIVENESS" as a key factor. The company is founded and managed by a team of professionals having more than a decade of global experience in the web services business.

Our well defined and transparent CUSTOMER SERVICE PROCESS has resulted in achieving 100% target hit rate despite the unique challenges that accompany every assignment undertaken.

Solution Strategies

Vy's approach starts with understanding of your goals, objectives and solution process, initiated by Vy experts through several brain storming sessions. Vy will then translate the results of the brainstorming workshop into a concept strategy for the customers, drawing from in-house methodologies and the expertise of its international partner.

We have the expertise, experience and ability to solve complex business problems by utilizing our technical knowledge, domain expertise, methodological processes, etc. We have developed, customized and designed unique web solutions starting from simple corporate websites to extensive web-based applications like CMS, enterprise application, shopping cart, etc. across various domains.

Our delivery center is equipped with state-of-the-art technologies. We continually upgrade our delivery infra-structure based on the latest trends and technology advancement, with 24/7 support service for our global customer needs.

Web Development & Maintenance

Vy provides Portal development and maintenance service for B2B, B2C, E-Business & E-Commerce segments. Solution is strategized to be cost effective and result in an excellent ROI for our customer taking Short term, mid term and long term dynamics into consideration.

Vy supports and maintains systems and solutions that were developed by the 3rd parties; be it your developed software solution or complete IT infrastructure. We are able to support, maintain and re-engineer your system or application as per your requirements.

The complete process is governed by a documented quality and project management methodology, which ensures highest quality of product development.

Mobile WEB - APP Development

Vy has an excellent team of professionals for mobile based Web and Mobile applications development. Our "responsive theme designing" assists our clients in transforming their web-based applications into mobile compatible ones.

Rather than simply providing the program, we help clients design their applications with unique features and functionality, coming up with innovative ideas with our domain and technology experience.

Our team of Android and iOS developers will assist and answer your inquiries in a quick and professional way.
